

# Diamond Studio BT series

## QUICK START GUIDE

Congratulations on the purchase of your Diamond Studio -BT studio monitor. We take great pride in engineering and building every Wharfedale Pro product and wish to thank you for entrusting us with your audio.

From the time Gilbert Briggs built his first loudspeaker in 1932, to the present day, we have maintained the same standard of quality in components, workmanship and performance.

Please take the time to read this guide completely in order to get the most from your new monitors.

Your full user manual can also be downloaded from [www.wharfedalepro.com](http://www.wharfedalepro.com)

### REAR INPUT CONTROLS

### BLUETOOTH OPERATION - SINGLE SPEAKER USE ONLY.

(Always turn volume down on rear to a safe level when making connections)

- 1 - Turn the Diamond Studio -BT on, press and hold the Bluetooth button until the LED turns a flashing Blue.
- 2 - On your mobile device, select Diamond Studio -BT
- 3 - The LED on the rear of the Diamond Studio will stop flashing and will turn solid Blue. Its paired!
- 4 - Play audio from the mobile device ensuring the output volume is appropriately set.

### BLUETOOTH OPERATION - TWS Link mode.

(Always turn volume down on rear to a safe level when making connections. Important : Turn off Bluetooth on your mobile device until TWS linking has been established)

- 1 - Turn the Diamond Studio -BT on. Press and hold the Bluetooth button until the LED turns a flashing Blue.
- 2 - Double tap the Bluetooth button (0.7 sec). The LED will flash between RED and BLUE. (It is looking for another Diamond Studio -BT)
- 3 - On the second Diamond Studio -BT monitor, repeat steps 1 and 2 above.
- 4 - When the monitors have paired between themselves, the LEDs will change from flashing RED and BLUE, to be Blue. One monitor will be flashing blue. It's waiting for you to connect....
- 5 - On your mobile device, select Diamond Studio -BT. If pairing is unsuccessful, select the other Diamond Studio -BT in your list of Bluetooth devices.
- 6 - Play audio from the mobile device ensuring the output volume is appropriately set.
