

High Quality Karaoke Microphone with the parts which cleared the quality standards test is Japan

- High quality Karaoke microphone has an excellent input sensitivity which assures the best quality for singing Karaoke.
- Parts which passed the Japanese quality reliability testing including environmental test and safety test successfully reduced quality deterioration.
- All the parts are made by trusted manufacturers and assembled by experienced workers. Therefore, the product has extremely low defect rates.

NKN-300

- Type: Unidirectional dynamics
- Frequency Range: 50Hz - 16,000Hz
- Sensitivity: -74dB \pm 3dB (0dB = 1v / 0.1Pa at 1kHz)
- Sound Pressure Level: Above 130dB (SPL)
- Output Connector: Integral 3pin XLRM type
- Dimensions (mm): 55.5(Φ) \times 173(L)
- Weight: 390g
- Impedance: 600 Ω (at 1kHz)
